1. Unscrew the Black Stand Cover

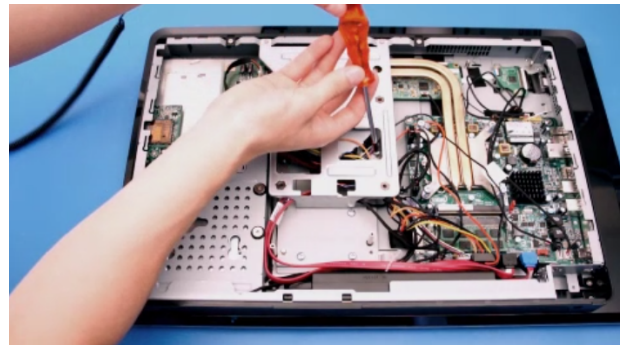

2. Remove the cover from under the stand.

3. Unscrew and remove the stand. It's held in with three screws.

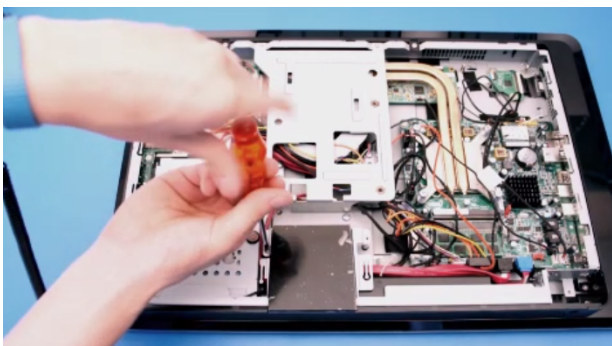

4. Place the VESA mount above the fan.

5. Screw the VESA mount into place, first using the four auxiliary screws on the top and bottom.

6. Next, screw in the four main screws in the sides of the stand.

7. Re-attach the Stand cover to the computer.

8. Install the small VESA cover in the back of the main panel using the included Screws. Replace the rear cover.
